

Spotlight Brightening Serum Compounding Instructions

1. Compound the product to activate: pour the powder into the bottle, reseal with the cap, and shake it for about two minutes.
2. Replace the cap with the dropper-top.
3. Note the date. Once compounded, the serum is stable and efficacious for 60 days. Ideal to store it in a cool environment, not in direct sunlight.
4. After cleansing, apply serum via dropper, all over your face, lightly. You may wish to apply a moisturizer after serum is dry (half a minute later).
5. Depending on the severity of pigment/ Melasma issues, one can use it 2x a day after cleansing (it is the first product applied) or just at night.
