

CLEAR + BRILLIANT POST TREATMENT CARE

After your treatment:

- Redness and swelling may occur. This is normal and will resolve within a few days.
- You may experience a heat sensation or “sunburn” feeling. This typically lasts for around 2 hours after treatment.
- Slightly darker skin appearance may last several days.
- Dry, sandpaper skin texture may last for several days.
- Microscopic Skin flaking begins 3-7 days after treatment.

Post-treatment care:

- Allow skin to heal; do not rub, scrub, or exfoliate for 3-5 days or longer
- Begin to use the IS Clinical calming kit provided as instructed
- Avoid exposure to sunlight.
- Use SPF 30+ sunscreen daily

Tips:

- Mineral make-up can be used to lessen the appearance of redness. We recommend colorescience mineral make-up
- Ice packs can be used for swelling, heat sensation, and itching sensation.
